

Current Job Openings

- **One Post Doctorial Associate in statistical signal processing:** We seek an outstanding researcher to work in the area of statistical signal processing for sensing. Prior research experience in related areas (e.g., detection and estimation, sensor arrays, and optimization) is required. Appointment is for two years starting immediately, and may be renewable after the two-year period. For qualification, a PhD degree in electrical engineering, applied math/statistics, or a related field is required. Strong publication record in recognized journals is highly desirable. To apply, send your CV, including a list of publications and references, to me by email (hli@stevens.edu).
- **Research Assistants:** RA positions are available for outstanding and motivated PhD students in the general areas of signal processing and wireless communications. Minimum requirement is a Bachelor's or Master's degree in EE, Math, or a relevant field. To apply, email your CV to me by email (hli@stevens.edu). Be assured that your application will be evaluated carefully. However, due to a large number of requests that I usually receive, I will respond only if there is a good match between your application and our needs.
