Mike Placentra II
CPE 322, 2013 Spring
Homework 3, due Feb 11

1. Project 1
   - Joe Vieitez
   - Project: App for Air Conditioner
   - Potential contributions:
     - app/software development
   - Possible adjustments:
     - This is like what you had in mind anyway, but having the app and air conditioners interact through a cloud-hosted service would make available a huge amount of data that could be monetized by the company
   - I would be willing to work with Joe on this project
2. Project 2
   - Eddie Anchondo
   - Project: Metal-Detective Microwave-Oven
   - Potential contributions:
     - low-level software development
   - Possible adjustments: none
   - I would be willing to work with Eddie on this project
3. Project 3
   - John Kelly
   - Project: NFC restaurant service
   - Potential contributions:
     - web/app development
   - Possible adjustments:
     - Maybe add integration with OpenTable?
   - I would be willing to work with John on this project
4. Project 4
   - Jeffrey Nicholls
   - Project: 360 meeting camera
   - Potential contributions:
     - software development
     - pattern recognition machine learning stuff from another class
   - Possible adjustments: none
   - I would be willing to work with Jeffrey on this project
5. Project 5
   - Kevin Hon
   - Project: Watch Breathalyzer
   - Potential contributions:
     - low-level software development
   - Possible adjustments:
     - maybe a recording capability? or bluetooth interaction with a smartphone for long-term logging, alerting friends, etc
