

Assignment 6

due Tuesday Oct. 21, 2008 at the beginning of the class.

1. Solve exercise 10.10 on page 670.
2. Solve exercise 10.21 on page 673.

BONUS (5pt) Explore and solve exercise 10.47 which refers to the case study on the book's CD. The data can be found in the folder EESEE and to access the flash player just double click on the "eese.html" file. The data used is not on the CD (or at least I was not able to find it), but it is on the accompanying website. For your convenience this assignment contains the data file as well. I split the original data into 2 separate files for ease of reading into R.
